Priyadarshni Bindal investigates barriers to oral care access for community-dwelling seniors, aiming to design an oral health strategy to improve and maintain quality of life. An oral health professional, clinical academic and researcher, Priya won the best presenter award at Federation Dental Internationale held in Poland in 2016.

Eric Gubesch will present the opportunities and challenges of generating renewable energy from ocean waves. A Bachelor of Ocean Engineering, he will introduce different types of wave energy converters with a focus on the oscillating water column type.

Kate Edwards is investigating the connection between exercise induced gut damage, oestrogen and the gut microbiome and how it may impact female health and performance. She completed her MSc in Sport and Exercise Nutrition at the University of Westminster in London.
